with magnetic holder

SOFTCLOSE system – Slow closing WC seat cover

The SOFTCLOSE system is characterized by its gentle and controlled closing action. The mechanism integrated within the WC seat hinges ensures a smooth and silent closure onto the ceramic bowl. A major advantage of this system is the protection it provides against damage caused by accidental dropping of the seat. It also enhances user safety and comfort when handling the seat. This system is particularly suitable for public restrooms and family households with children.

Duroplast

Toilet seats made of high-quality Duroplast material meet the expectations of even the most demanding customers. The Duroplast material provides a pleasant seating experience by significantly reducing the discomfort of sitting on a cold toilet seat surface.

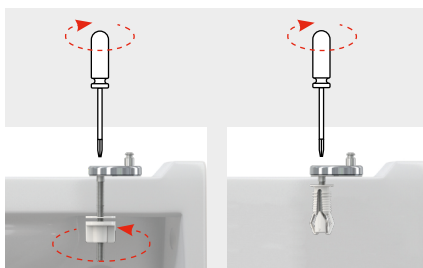

CLICK System for easy cleaning

The CLICK system integrated into the WC seat hinges allows for easier and faster cleaning of both the toilet pan and the seat itself. By pressing the two buttons located on the inner side of the seat hinges, the seat can be easily released and lifted for thorough cleaning. After cleaning, the seat can be quickly and securely reattached by simply pressing it back onto the hinges.

Adjustable hinges for perfect compatibility

Easy installation of Alca toilet seats is ensured by the wide range of hinge adjustability. This flexibility, combined with the carefully designed seat shape, allows the seats to fit a wide variety of ceramic pans. The hinges are made of high-quality stainless steel and coated with durable white powder paint to seamlessly blend with the ceramic surface, ensuring long-lasting performance and reliability.

Comfortable top mounting

For Duroplast seats equipped with the CLICK system, we offer an alternative to traditional bottom-mounted hinges – a convenient top fixing system, designed especially for fully skirted toilets. This solution ensures easier installation and maintenance, even in spaces where access from below the pan is limited.

The integrated seat insert with magnetic holder

Duroplast toilet seats A603 and A606 are equipped with a fully integrated infant potty seat insert. The insert is attached to the hinge pins and can be easily removed when needed. Made from lightweight polypropylene, it allows a child to safely and effortlessly handle the seat. When not in use, the potty seat insert is magnetically held in place by the seat cover, allowing convenient and comfortable use for adults.
