Saves up to 10% of flushed water in the toilet

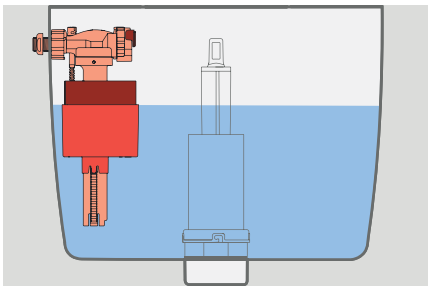
Fill valves with delayed filling A150PDF-3/8" and A160PDF-3/8"

The new fill valves meet our customers' demands for **low water consumption**. They are suitable for WC systems as well as freestanding toilets.

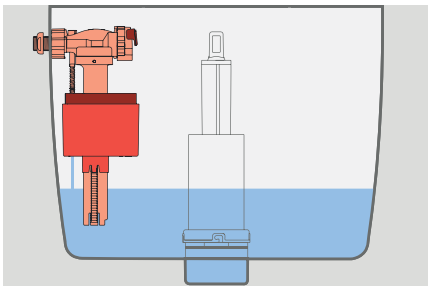
Fill valves are designed so that the toilet cistern starts refilling only after the flushing is completed. As a result, the newly filled water does not flow directly into the toilet bowl, which leads to savings in water and money.

Water savings of up to 10 % of water per person per year

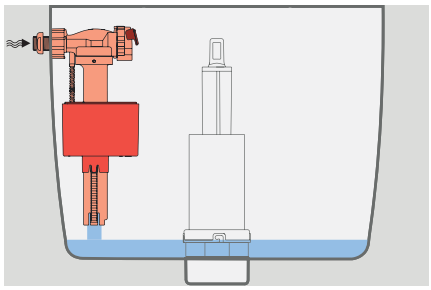
Quiet filling below 20 dB



1 **Before starting the flushing. The cistern is full of water and ready for rinsing the toilet bowl.**



2 **When flusing, water drains through flush valve to the toilet bowl. Fill valve is still closed.**



3 **Water filling begins only after the flush valve is closed. You save water with every use of the toilet.**

Assortment overview

new

A150PDF-3/8"
Side inlet fill valve with delayed filling, plastic thread 3/8", for plastic WC cisterns and pre-wall installation systems

new

A160PDF-3/8"
Side inlet fill valve with delayed filling, metal thread 3/8", for plastic WC cisterns and pre-wall installation systems

new

Freestanding WC system AM123/1120E: maximum stability, minimum water consumption

Thanks to the reinforced frame and robust legs, it is not necessary to anchor the WC module to the wall – securing it to the floor is sufficient. This significantly expands the possibilities for its placement, whether in open spaces or next to non-load-bearing partitions (e.g., next to a wardrobe in the bedroom). Order code: AM123/1120E

Smart flushing – annual savings of up to 10 % water

With the new fill valve, it is possible to save up to 10 % liters of water per person per year during flushing.

Installation by a single person

The system allows for quick and precise installation even by one person. The assembly is thus simpler, more comfortable, and more efficient.

Compatibility with Alca flush plates

Choose any Alca flush plate – it works with all our WC modules.

Flushing 2/4 l

The A06ES water-saving flush valve is included in the package, now with silicone sealing.

Freestanding frame construction

The freestanding frame construction allows for fixation only to the floor. Don't be limited by space or technical requirements.

Waste pipe reduction

The package includes a waste pipe reduction DN 90/100 made of PVC.

15 **Year warranty**

WC system with connector for extraction fan

Water savings of up to 10 % compared to a standard valve

Individual in every detail

Perfect match

It is possible that we can match your personal taste with charming pink tones. Or you might prefer a dazzling gold colour? Maybe your natural match is the gun metal. Whatever you decide, there are some things you can always rely on.

The perfect colour fastness and the resistance to abrasion. And so even your bathroom can be brought to perfection in every last detail.

Available length variants:

- 550/650/750/850 mm
- Length 950 mm on order

Maximum space, minimum limits

A trap that adapts to you

The range of space-saving furniture traps is expanding with new variants. A popular solution for maximizing the space beneath the washbasin is now available in a wider range of options. Compatible with most bathroom cabinets on the market. You are not dealing with the solution, but with the design.

Easy to clean

Flow rate up to 34 l/min

Available from 7/2026

Wash-basin furniture trap DN 32 with union nut 5/4", double washbasin

new

Compact solution without compromises

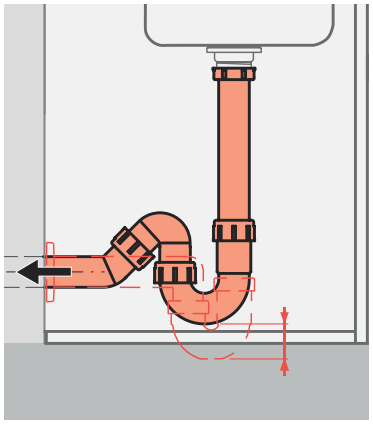
Space saving under the sink of up to 5 cm compared to standard solutions

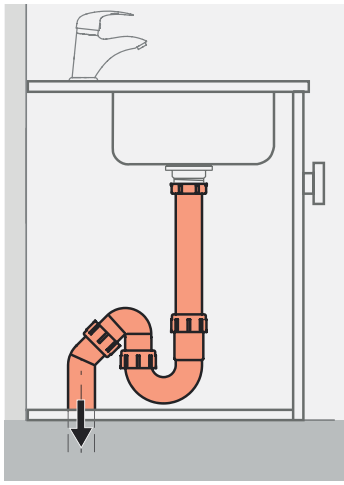
Gain more space where it matters most. This innovative trap is designed for minimal distance between the sink and the waste, allowing for efficient use of space even in compact kitchens or bathrooms.

Despite its space-saving design, it maintains a high water column that reliably prevents odors from the waste. As a result, the odor trap remains functional even after prolonged periods of non-use without the need for frequent water replenishment.

Minimum installation height

Simple installation and reliable operation





Assortment overview
